## PROFILE

I am a FullStack Developer with expertise in React.js, Next.js, nodeJs, and Mongo bd. I completed the SVCollege FullStack Development Course and the Harvard University SC50 online course to expand my skillset. I intern at Abilisense and have developed a Goal Achievement app, which is available at <https://goal-achievement.vercel.app/> and on GitHub at <https://github.com/David-Beninson/goalAchievement>. My aim is to deliver high-quality work while continuously seeking professional development opportunities.

## PROJECTS

### Projects

As a developer, I have created several applications. Here are a few highlights:

- Developed a Goal Achievement app that assists users in breaking down long-term goals into achievable milestones. This fully responsive web application can be accessed at <https://goal-achievement.vercel.app/>.
- Created a Sudoku game that provides users with three difficulty levels - easy, medium, and hard. This game can be accessed at [https://david-beninson.github.io/sudoku\\_app/](https://david-beninson.github.io/sudoku_app/).

To explore more of my projects, You can visit my GitHub profile at <https://github.com/David-Beninson>.
